Serving the Aviation Industry: Total Solution for AIRLINES Commercial Aircraft, Vehicles & Equipment

About Us EMSIL Technologies Pte Ltd was set up in July 1990 as an Asia Sales Office for Special Cutting Tools for the Aviation, Military and Automotive Industries in the Asia region.

Our product range includes Aircraft Cutting Tools, Hand Tools and Aircraft Toolings and our tools are marking under our own brand “EMSIL” with registered trade mark. We also represent for USA and European Ground Support Equipment Manufacturers.

Our Capabilities Today EMSIL Technologies is an established partner and approved vendor for most major Airlines, MRO's for Aviation, Military, Automotive and other Industries in this Asia region.

EMSIL services also includes technical know how, production advice and recommendation to improve tool design to achieve greater efficiency, higher productivity and quality standard to contribute to our customer's success. We produce a wide range of aircraft cutting tools (equivalent to Boeing and major aircraft manufacturers specifications), for use in repairing, maintenance, overhaul, modification and conversion of aircrafts.

Quality & Standard All EMSIL Aircraft tools are produced according to the specification and quality of National Aerospace Standard (NAS), Boeing, FAA, ISO & RINA Standard using the highest quality raw material, machinery and equipment, quality control and certified before delivery to our customers.
